Hello student kindly try all means possible to archive your goals. Life without education is terrible. Just remember that math's is all about real concept and content. Correct answers doesn't matter.we mark a possible method of finding it so if you think leakage is the solution of everything then you are wrong.
Math's without content is nothing. Leakage might help you in other subjects but for math's and chemistry it's something else so spent much of your time reading and doing more exercises
