1. You are provided with:

- A resistance wire mounted on millimeter scale
- Two dry cells in a cell holder
- A voltmeter
- A switch
- Six connecting wires, two with a crocodile clip at one end

Proceed as follows:-

(a) Set up the circuit as in the figure below and determine the total electromotive force E , of the cells.

Electromotive force E , of the cells Volts. (1 mark)

(b) Set up the circuit shown in the figure below, connect the wire with clip on the mounted wire at a length (L) of 10cm from the end marked A. Record the voltmeter reading in the table provided in part (c) below:

(c) Repeat the procedure in (b) above for the following values of L

| L(cm) | V(volts) | E-V(volts) | $\frac{V}{E-V}$ |
|-------|----------|------------|-----------------|
| 10 | | | |

QUESTION 2

PART A

2. You are provided with the following apparatus:

- A candle
- A lens holder
- A convex lens
- A screen
- A metre rule
- An object

Proceed as follows:

Using an object infinity outside the room, focus its image on the screen provided. The image should be as sharp as possible and inverted. Measure the distance from the lens to the screen h cm.

h.....cm (1 mark)

Arrange the candle flame, the lens, and the screen as shown in the diagram below:

- b) i) For particular value of u , adjust the position of the screen until a sharp image appears on the screen. Measure distance V cm. Repeat the experiment for each of the other values of u , and enter the results in the table below: **(5mks)**

| Distance u (cm) | Distance V (cm) | uv (cm^2) | $U + v$ (cm) |
|-------------------|-------------------|-----------------|--------------|
| 12 | | | |
| 15 | | | |
| 18 | | | |
| 21 | | | |
| 24 | | | |
| 27 | | | |

(ii) Plot a graph of $uv \text{ cm}^2$ against $u + v \text{ cm}$ (4 marks)

iii)Determine the slope of the graph (2 marks)

PART B

You are provided with the following:

- A metre rule.
- A knife edge.
- One 50g mass and a 100g mass.
- Some thread.
- Some water in a beaker.
- Liquid L in a beaker.
- Tissue paper.

Proceed as follows:

- (c) Balance the metre rule on the knife edge and record the reading at this point.

Balance point cm **(1 mark)**

For the rest of this experiment the knife edge must be placed at this position.

- (d) Set up the apparatus as shown in the figure 1. Use the thread provided to hang the masses such that the positions of the support can be adjusted.

The balance is attained by adjusting the position of the 100g mass. Note that the distance **X** and **D** are measured from the knife edge and the 50g mass is fully immersed in water. Record the values of **X** and **D**.

X = cm **(1 mark)**

D = cm

e) Apply the principle of moments to determine the weight W_1 of the 50g mass in water and hence determine the upthrust U_w in water. **(2 marks)**

$W_1 =$
.....
..... N

$U_w =$
..... N

Remove the 50g mass from the water and dry it using tissue paper.

(f) (i) Now balance the metre rule when the 50g mass is fully immersed in the liquid L. Record the value of the distance χ .

$\chi =$ cm **(1 mark)**

(ii) Apply the principle of moments to determine the weight W_2 of the 50g mass in the liquid L and hence determine the up thrust U_L in the liquid.

$W_2 =$ **(1 mark)**

$U_L =$ **(1 mark)**

(g) Determine the relative density R.D of the liquid L, given that: **(1mark)**

$$R.D = \frac{U_L}{U_w}$$

Hence determine the density of liquid χ in kg/m^3 . (Given that density of water in 1000kg/m^3).

Q1. COMPREHENSION PASSAGE (20MKS)

Read the following passage and answer the questions that follow.

You may think that expecting food to change your life is too much to ask. But have you considered that eating the right food at the right time will increase your energy, help you manage weight and ward off major illnesses?

Researchers have found that eating a meal with plenty of protein leaves you feeling more satisfied for longer when compared to a meal loaded with low - quality carbohydrates. Your body takes longer to digest protein, leading to a gradual increase in blood sugar. The high protein breakfast will therefore carry you through the morning and, more importantly, through your tea break. Many high - carbohydrate meals are absorbed quickly and send blood sugar on a roller coaster ride, taking your appetite with it and depleting your energy.

Many foods contain antioxidants, but fruits and vegetables may be the richest source. Behaving like chemical warriors, antioxidants neutralize molecules known as free radicals before they damage arteries and body cells. This protects you from heart diseases, high blood pressure, cancer and diabetes; you can now see why antioxidant foods should be consumed in generous portions. Actually, forget pills - antioxidants work best when consumed in foods. In fact, nutritionists recommend that we eat five portions of fruit and vegetables a day. It's less daunting than it sounds: a portion equals a piece of fruit, three tablespoons of cooked vegetables or a glass of flesh juice.

And do you desire to relieve yourself of some baggage? Calcium is the latest weight - loss star to appear on the scene. Scientist stumbled on its magic by accident. From a study that measured the blood pressure of obese people, it was discovered that those who took one large tub of yoghurt a day in their diet lost an average of eleven pounds of body fat in one year, even though they did not eat less.

A follow - up study found that people on a high - calcium diet lost more weight and fat than did people on a low calcium diet -and again, both consumed the same number of Calories. Researcher* believe calcium encourages fat cells to stop "getting fatter". Instead, the cells burn extra fat without you having to go anywhere near a gymnasium.

It probably sounds strange to say that you can eat more in order to lose weight. Obviously, the question you should ask immediately is, "Eat more of what?" We are talking about foods rich in fibre. They have what is referred to as low energy density; that translates to few calories relative to weight. This means that you can down a mountain without fear of calorie overload.

Fibre also aids weight loss because it's filling. Most high fibre foods take a lot of chewing, triggering your body's fullness sensors. Moreover, you absorb the food more slowly so you feel full longer. Will the wonders of food ever cease? Not if researchers in nutrition keep up their pace. Let them keep the good news flowing - such as the fact that we don't have to starve ourselves to lose weight and keep disease at bay.

H.R. Ole Kulet, Blossoms of the Savannah

Read the excerpt below and then answer the questions that follow.

(25 marks)

“What do you mean?” he asked, suddenly sitting up. “I hope you don’t imply that our culture comes second. Do you?”

“Not really, my husband,” she said ruefully, beating a hasty retreat. “Our culture is everything and it rules our lives.”

“Good,” he said authoritatively. “Now listen, you must immediately start counselling the girls to understand their roles as potential wives of the men of Nasila. Prepare them to appreciate and accept their future responsibilities as mothers and home builders.”

“I’ll do that my husband,” she said quietly.

“One other thing,” he said evenly. “I’ll ask Simiren to request that young teacher called Parmuat, who is of our clan and therefore a brother to the girls to find time to teach them a few home truths. After that we shall call enkamuratani to play her part before we give them away.”

Those were the words, whose utterance she dreaded. And once uttered, she knew, the words instantly became an inviolable edit. Now that he had spoken, the pain was already harrowing and torment in her unbearable. She was torn between her love for her daughters and her dutiful role of a faithful and obedient wife of Ole Kaelo. But in her culture there was no room for dissent, especially if the subject was in conformity with the culture. Who would side with her if she were to oppose the cultural rituals?

Her only ally would be the woman the elders of Nasila contemptuously called entangoroi or the wasp. Those who honoured her called Emakererei , for she was said to have attended Makerere university in Uganda., where she attained her degree in Veterinary Science. Mama Milanoi knew her well. Her actual names were Minik ene Nkoitoi. Outside Nasila, she was respected and honoured. At thirty, she was already managing an expansive government sheep ranch reputed to hold hundreds of thousands of sheep, about one hundred kilometres away from Nasila. Under her were hundreds of employees who worked at the ranch in Nasila, however, she was regarded as the devil incarnate. She was hated and reviled for criticising and campaigning vigorously against traditions that she said abused the rights of the girl child namely girls’ circumcision and early marriages. And that had put her in direct collision with the people of Nasila. If she aligned herself with a person who Nasila regarded as having such an obnoxious reputation, where would her marriage stand?

2. Read the poem below and then answer the questions that follow.

My grandmother

She kept an antique shop – or it kept her.
Among Apostle spoons and Bristol glasses,
The faded silks, the heavy furniture,
She watched her own reflection in the brass
Salvers and silver bowls, as if to prove
Polish was all, there was no need for love.

And I remember how I once refused
To go out with her, since I was afraid.
It was perhaps a wish not to be used

Like antique objects. Though she never said
That she was hurt, I still could feel the guilt
Of that refusal, guessing how she felt.

Later, too frail to keep a shop, she put
All her best things in one long, narrow room.
The place smelt old, of things too long kept shut,
The smell of absences where shadows come
That can't be polished. There was nothing then
To give her own reflection back again.

And when she died I felt no grief at all,
Only the guilt of what I once refused.
I walked into her room among the tall
Sideboards and cupboards – things she never used
But needed: and no finger-marks were there,
Only the new dust falling through the air.

Soma kifuatacho kisha ujibu maswali.

Lugha inaweza kueleza kwa jumla kuwa ni mfumo wa kueleza chanzo au kiini cha mawasiliano na sote tunakubaliana kuwa matumizi yake yameanza tangu kuumbwa kwa binadamu kwani ni vigumu kukisia kuwepo kwa jamii ya watu bila lugha ya mawasiliano yoyote ile.

Katika taifa lolote, huwepo na lugha moja au hata zaidi ya moja ambayo huwa ndicho chombo zatika cha mawasiliano ya taifa katika nyanja za: elimu, maandishi, siasa na biashara. Kwa mfano mataifa ya Kanada hutumia lugha mbili kwa usawa kama lugha za taifa na za kikazi. Maana ya lugha ya taifa ni lugha moja ambayo huteuliwa kutumika katika shughuli zote za taifa hasa katika nchi yenye lugha nyingi za kikabila. Lugha ya taifa ni muhimu sana kwa maisha na maendeleo ya taifa lolote lile. Lugha hii huwa ndiyo kiungo cha kueneza umoja na uelewano miongoni mwa jamii nyingi tofauti na huwa kama kitambulisho kwao kwa kuwa wao ni ndugu wa jamii moja kubwa, yaani taifa lao.

Kenya ni mfano mzuri wa taifa lenye lugha nyingi zinazozidi 40 za vikundi vidogo vidogo vya kikabila. Hapo kabla ya miaka mia moja hivi iliyopita kila kimojawapo cha vikundi hivi kilijitambulisha kama taifa huru. Baada ya kuja kwa serikali ya kikoloni na hasa baada ya Kenya kujinyakulia uhuru, haja ya kuunganisha raia wote chini ya taifa moja lenye uongozi na shabaha moja lilikuwa ndilo jambo lililozingatiwa sana. Kwa hivyo utamaduni wa taifa la Kenya ni mchanganyiko wa tamaduni za watu wengi wenye mila, desturi, imani na itikadi tofauti. Utamaduni humaanisha jumla ya amali na tabia za watu wa jamii fulani. Amali hizi zinafungamanisha fikira, ustaarabu, mila, taasisi na sanaa za aina zote za jamii inayohusika. Ili kujieneza na kujiimarisha, taifa huhitaji chombo hicho kuwasiliana na kuwaunganisha watu wake wenye asili mbalimbali. Chombo hicho huwa ni lugha ambayo siyo tu kwamba ni sehemu ya utamaduni wa jamii bali pia ni njia muhimu sana ya kutawanyia na kustawishia ule utamaduni.

Katika taifa lenye lugha nyingi kama Kenya kwa mfano, lugha ya taifa inayozungumzwa na kueleweka na idadi kubwa ya raia ambayo imekiuka mipaka na tofauti za kikabila ni njia muhimu sana ya kueneza maongozi ya taifa, bendera ya taifa, ndicho kielelezo cha taifa lolote lile lililo huru. Lugha kama hiyo huvunja na hukomesha hisia za kibinafsi na kikabila na badala yake kuunda moyo wa uaminifu wa kitaifa.

Zaidi ya kuwa chombo cha mawasiliano, lugha ni kielelezo cha fikira na hisia za binadamu. Lugha ya watu fulani haituelezi tu ujuzi au maarifa yao bali pia mtazamo wao kimaisha, falsafa na mawazo yao. Kwa ufupi lugha hutufahamisha namna akili za watu waizungumzayo ile lugha zinavyofikiri na kutafanya maazimio. Lugha ni sehemu ya utamaduni wa taifa ilimozaliwa na lazima lugha hiyo ifunzwe katika muktadha wa maisha ya jamii ihusikayo. Utamaduni wa jamii havitenganiki na lugha yake.

2. UFUPISHO: (ALAMA 15)

Soma kifungu kifuatasho kisha ujibu maswali.

Kwa kawaida, binadamu huishi kwa kutangamana na binadamu wenzake. Katika kutangamana huku, watu huathiriwa kitabia, kifikiria, kimavazi na kimaisha kwa jumla. Watu wote katika jamii wana uwezo wa kuathiri na kuathiriwa na wenzao wa umri mmoja. Hata hivyo, walio katika hatari ya kuathiriwa zaidi na mahirimu wao ni vijana. Hali hii ya kuathiriana huitwa shinikizo-rika au shinikizo-marika. Vijana huaminiana na kuthaminiana sana. Kwa sababu hiyo, ni rahisi sana kuingizwa katika mitego na wenzao. Isiaminiwe kuwa vijana pekee ndio wanaoathiriwa na shinikizo-rika. La hasha! Watu wazima pia huwafuata wenzao mithili ya bendera kufuata upepo. Mwenzake akinunua gari, yeye pia hukimbilia mkopo kununua gari la sampuli iyo hiyo bila kuwazia kima cha kibindo chake.

Wataalamu wa saikolojia husema kuwa kukabiliana na tatizo la shinikizo-rika si rahisi kwa sababu shinikizo-rika huleta mtafaruku wa kinafsi akilini mwa anayeathiriwa. Nafsi moja humshawishi kufuata wenzake huku nyingine ikimnasihi kuandamana upekee au ubinafsi wake. Shinikizo-rika huathiri sana mahitaji ya kisingi ya binadamu. Ikumbukwe kuwa mahitaji haya ya kimsingi ni ya kila mwanadamu, nayo ni kama vile kupata lishe, hewa safi, kupenda na kupendwa miongoni mwa mengine. Kila mtu hutaka kujihusisha na kundi la watu ambao watamfanya kuhisi kuthaminiwa na kukubalika. Kutokana na haja ya kutaka kukubalika, anayetaka kutambuliwa huridhia matakwa ya wenzake bila hata kuyawazia.

Shinikizo-rika hujitokeza kwa sura nyingi. Mathalani, vijana huwafanya wenzao kuona kuwa wana hatia wasipoafiki kutekeleza kama wanavyoshinikizwa. Kauli kama vile ‘tulifikiri wewe ni mmoja wetu’ au ‘usiposhirikiana nasi utakuwa umetuvunja moyo’ hutamalaki. Wanaokataa kushinikizwa hubezwa na kufanyiwa stihizai na wenzao na hata kutengwa. Vitisho hutolewa, wakati mwingine, na anayeshinikiswa akidinda, mabavu hutumika.

Ni muhimu kwa watu, hasa vijana, kufahamu kuwa shinikizo-rika lipo na wanapokabiliwa na tatizo hilo, watambue kuwa wana haki ya kusimama kidete kutetea msimamo wao dhidi ya wenzao. Kumbuka, baridi huwazizima kondoo kwa namna tofauti.

Kama njia moja ya kukabiliana na shinikizo-rika, wanao saikolojia wanapendekeza watu kujiamini na kuelewa kwamba wana haki ya kuwa tofauti na kuwa na upekee wao. Mtu anapojiamini na kushikilia msimamo wake, anaweza kujiepusha na madhara yatokanayo na shinikizo-rika. Asiyejiamini huwa mwepesi sana wa kuingizwa katika lindi la mashaka na wenzake.

PASSAGE A

La réussite du programme d'éducation des adultes prisonniers au Kenya est confirmée par l'enthousiasme des apprenants. Même ceux qui sont condamnés à mort ont manifesté un vif intérêt à participer au programme.

Les apprenants ont manifesté cela, après avoir réussi aux examens nationaux de fin d'études primaires. Mokeira, qui est en prison depuis 1997 pour vol avec violence, a dit qu'elle devait passer son examen étant donné qu'elle perçoit la vie du côté positive. <<J'ai toujours eu de l'espoir que je quitterai la prison et que je mènerai une vie normale une fois partie d'ici.>>

Elle dit qu'elle avait abandonné les études en sixième primaire, en ajoutant que c'était une joie d'avoir la chance de continuer ses études en prison.

PASSAGE B

A l'étalage du marchand de poissons, il y a des crabes de la même espèce. L'un d'eux est plus gros que les autres. Cela indique qu'il est le plus vieux du lot. Le marchand m'explique qu'un crabe grandit toute sa vie. Il change régulièrement de carapace. Celle-ci est une croûte très dure, faite de calcaire très dure, faite de calcaire. Elle protège le corps mou et fragile de l'animal. Lorsque celui-ci grossit, il doit sortir de sa carapace devenue trop petite. Le crabe se dissimule alors de son mieux, se gonfle d'eau et attend que sa peau fabrique une nouvelle croûte.

Lorsqu'on veut acheter un crabe, il faut savoir repérer ceux qui viennent de muer. Ceux-ci ont beaucoup d'eau et peu de chair. Il ne faut donc pas les choisir car ils sont peu appétissants.

Questions.

(a) Où achète-on les crabes? (½ point)

(b) Quest-ce que c'est une carapace? (½ point)

(c) Que se passé-t-il quand le crabe deviant grand? (½ point)

PASSAGE C

La vie et la survie de l’humanité passent par la protection de l’environnement. Très peu de notre planète ont compris ce message. Nombreux sont ceux qui s’adonnent à la destruction des forêts, à la pollution des airs et des sources d’eau, à la dégradation du relief. Et cela a pour conséquences les sécheresses, les famines, la pauvreté qui entraînent la mort d’hommes, d’animaux domestiques et sauvages.

La vie d’un être humain est sacrée et très courte. Elle doit être aisée et heureuse. Il est donc de l’obligation de tous de savoir la protéger par tous les moyens.
