## APPROXIMATIONS AND ERRORS

| KCSE 1989-2012 Form 3 Mathematics | Space |
| :--- | :--- | :--- | :--- |
| 1. | $\mathbf{1 9 9 6} \mathbf{Q} \mathbf{1 5} \mathbf{P 1}$ |
| The figure below represents a hollow cylinder. The |  |
| internal and external radii are estimated to be 6 cm and |  |
| 8 cm respectively, to the nearest whole number. |  |
| The height of the cylinder is exactly 14 cm. |  |

|  |  | Working Space |
| :---: | :---: | :---: |
| 3. | 1998 Q 15 P1 <br> The radius of circle is given as 2.8 cm to 2 significant figures <br> a) If C is the circumference of the circle, determine the limits between which $\mathrm{c} / л$ lies <br> b) By taking Л to be 3.142 , find, to 4 significant figures the line between which the circumference lies. |  |
| 4. | 1999 Q 9 P1 <br> The length and breadth of a rectangular floor were measured and found to be 3.1 m and 2.2 m respectively. If possible error of 0.01 m was made in each of the measurements, find the: <br> (a) maximum and minimum possible area of the floor <br> (b) Maximum possible wastage in carpet ordered to cover the whole floor |  |
| 5. | 2000 Q 10 P1 <br> The length and breadth of a rectangular paper were measured to be the nearest centimeter and found to be 18 cm and 12 cm respectively. Find the percentage error in its perimeter. |  |
| 6. | 2002 Q 8 P2 <br> The sides of a triangle were measured and recorded as $8 \mathrm{~cm}, 10 \mathrm{~cm}$ and 15 cm . Calculate the percentage error in perimeter, correct to 2 decimal places. |  |

|  |  | Working Space |
| :---: | :---: | :---: |
| 7. | 2005 Q 9 P1 <br> In this question Mathematical Tables should not be used <br> The base and perpendicular height of a triangle measured to the nearest centimeter are 6 cm and 4 cm respectively. <br> Find <br> (a) The absolute error in calculating the area of the triangle <br> (2marks) <br> (b) The percentage error in the area, giving the answer to 1 decimal place <br> (2marks) |  |
| 8. | 2006 Q 4 P2 <br> By correcting each number to one significant figure, approximate the value of $788 \times 0.006$. Hence calculate the percentage error arising from this approximation. <br> ( 3 marks) |  |
| 9. | 2007 Q 8 P2 <br> A rectangular block has a square base whose side is exactly 8 cm . Its height measured to the nearest millimeter is 3.1 cm . Find in cubic centimeters, the greatest possible error in calculating its volume. <br> ( 2 marks) |  |
| 10 | 2008 Q 5 P2 <br> The top of a table is a regular hexagon. Each side of the hexagon measures 50.0 cm . Find the maximum percentage error in calculating the perimeter of the top of the table. <br> (3marks) |  |

|  |  | Working Space |
| :---: | :---: | :---: |
| 11 | 2010 Q 1 P2 <br> The length and width of a rectangle measured to the nearest millimeter are 7.5 cm and 5.2 cm respectively. Find, to four significant figures, the percentage error in the area of the rectangle. <br> (3 marks) |  |
| 12 | 2011 Q 9 P2 <br> The radius of a spherical ball is measured as 7 cm , correct to the nearest centimeter. Determine to 2 decimal places, the percentage error in calculating the surface area of the ball. |  |
| 13 | 2012 Q11 P2 <br> The base and height of a right angled triangle were measured as 6.4 cm and 3.5 cm respectively. Calculate the maximum absolute error in the area of the triangle. <br> (3 marks) |  |
